

Workers' Compensation Insurance CompleteComp: Pay-As-You-Go

The Dilemma

Purchasing Workers' Compensation insurance is a necessary and often painful experience. Many companies looking for coverage are hit with large up-front premium charges - "down payments" that commonly start at 25% of the estimated premium and can be as much as 100%.

The Solution

By integrating *CompleteComp* with payroll, you can make workers' compensation payments based upon your actual payroll volume. Your premium calculations are directly integrated with actual wages per job, on a per pay period basis. And since Complete Payroll Solutions has its own insurance agency and resident experts to consult with you, we can find you the best rates and coverages available.

The Benefits

CompleteComp allows for more accurate budgeting, reduces your initial outlay of cash, and increases your cash flow. And there are no more inconvenient year-end audits or high finance charges to worry you. *You are in control.*

- No billing hassles
- Low down payment
- No finance charges
- Improved cash flow
- Simplified audits
- Available with all insurance companies including the high risk pools
- Great for all businesses especially those with fluctuating payrolls
- Premiums calculated with each payroll
- Detailed employee level reporting

The Products

and more.
