

# Transform the way you collect, manage and process your employee time.

Our platform is a complete time & attendance system that can be used all on its own or as part of a complete human capital management solution, with human resources, payroll, and benefits enrollment. Our system replaces tedious time-tracking procedures and completely eliminates manual collection of the information needed for payroll.

Timecard

**Our platform is the nerve center of your time & attendance system.** It connects various methods of time collection such as physical time clocks, the iSolved mobile app, or even self-service, providing maximum flexibility no matter where your employees are located or how they work. Our Time system was born in the cloud, and engineered for the small-to-mid-sized employer. It offers simple, intelligent navigation, robust reporting and powerful configuration options.

Our platform can be extended to include scheduling as well. With the Scheduling and Attendance module, we can build schedules, monitor attendance and be alerted to exceptions.
